

Healthcare unified identity security: Driving efficiency while reducing risk

Healthcare demands day one access to systems and applications needed for patient care. However, this often results in overprovisioned access, creating security risks.

Healthcare organizations can modernize their identity program with unified access governance and real-time access with advanced risk controls. SailPoint Identity Security Cloud and Imprivata Enterprise Access Management (formerly Imprivata OneSign and Imprivata Confirm ID) deliver best in breed solutions for identity security and access management. SailPoint and Imprivata combine industry-leading technologies to safeguard and automate access to your healthcare organization's most critical applications and data without sacrificing clinical efficiency. Together, we can help you enable clinicians faster, reduce cyber risk, and maintain a high standard of compliance.

Integration overview

The integration of SailPoint Identity Security Cloud and Imprivata Enterprise Access Management enables organizations to authenticate user access with single sign-on and multifactor authentication, confirm that users have the right access, and ensure that authorization policies are enforced.

BENEFITS

- ▶ Reduce the amount of time it takes for front line workers to gain access to crucial applications from weeks to minutes with integrated identity security and access management.
- ▶ Use one solution to build roles, review access history, and automate the management of current access for all internal and external identities and vendors.
- ▶ Satisfy audit requests with a unified audit trail of employee's access history and how access has changed over time.
- ▶ Reduce risk by providing your compliance team with a central location to review and respond to real-time visibility of user access and identity behaviors.
- ▶ Transform threat detection and response with AI that identifies risks by analyzing access patterns and user behaviors across your organization.

Leverage SailPoint and Imprivata's identity security and access management integration to:

- Automatically provision and deprovision users
- Provide unified access governance for joiner, mover, leaver processes
- Deliver password-less access and multi-factor authentication including shared workstations and mobile devices
- Leverage activity-based recommendations for ongoing access requests and role modeling
- Identify unused access licenses through comprehensive user access data logs
- Perform AI-driven certifications and detect risky outliers

About Imprivata

Imprivata is the digital identity company for mission- and life-critical industries, redefining how organizations solve complex workflow, security, and compliance challenges with solutions that protect critical data and applications without workflow disruption. Its platform of interoperable identity, authentication, and access management solutions enable organizations in over 45 countries to fully manage and secure all enterprise and third-party digital identities by establishing trust between people, technology, and information.

About SailPoint

SailPoint equips the modern enterprise to seamlessly manage and secure access to applications and data through the lens of identity – at speed and scale. As a category leader, we continuously reinvent identity security as the foundation of the secure enterprise. SailPoint delivers a unified, intelligent, extensible platform built to defend against today's dynamic, identity-centric cyber threats while enhancing productivity and efficiency. SailPoint helps many of the world's most complex, sophisticated enterprises create a secure technology ecosystem that fuels business transformation.
