

Identity at Your Service

Ensure the right people have the right access to the right systems, applications and data.

Run identity security from the cloud and let Optiv manage the operations for you.

Cloud adoption is exploding with nearly **1,300** cloud applications in use in an average enterprise.¹

Identify Where to Start

45%

of firms surveyed claim they simply, “do not know where to start,” when it comes to carrying out identity security and governance strategies.

40%

said “we don’t have the resources to support it.”²

Regardless of your cyber maturity, Optiv’s Identity Security services provide a full-featured identity program utilizing a subscription-based cloud model designed for your business needs.

Empower your organization to answer three critical questions:

Who has access to what?

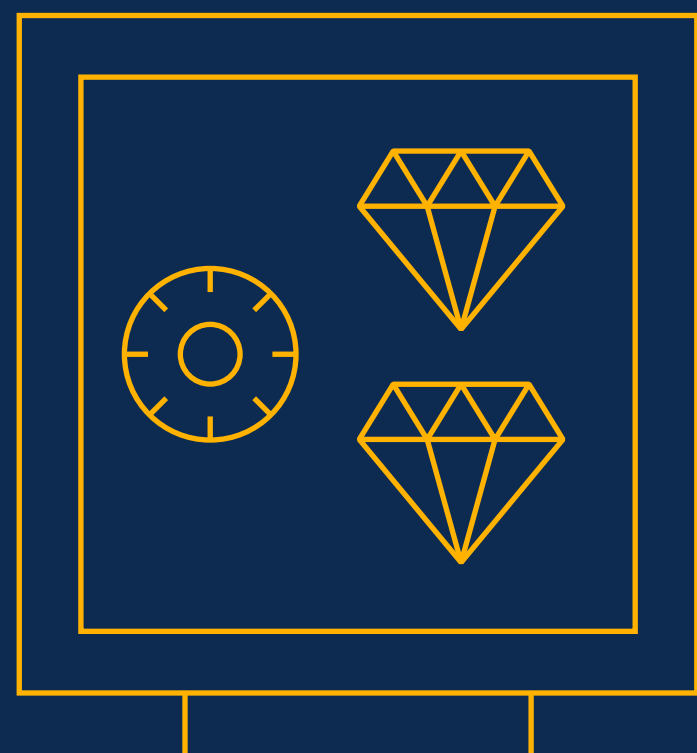

Should they have that access?

How are they using that access?

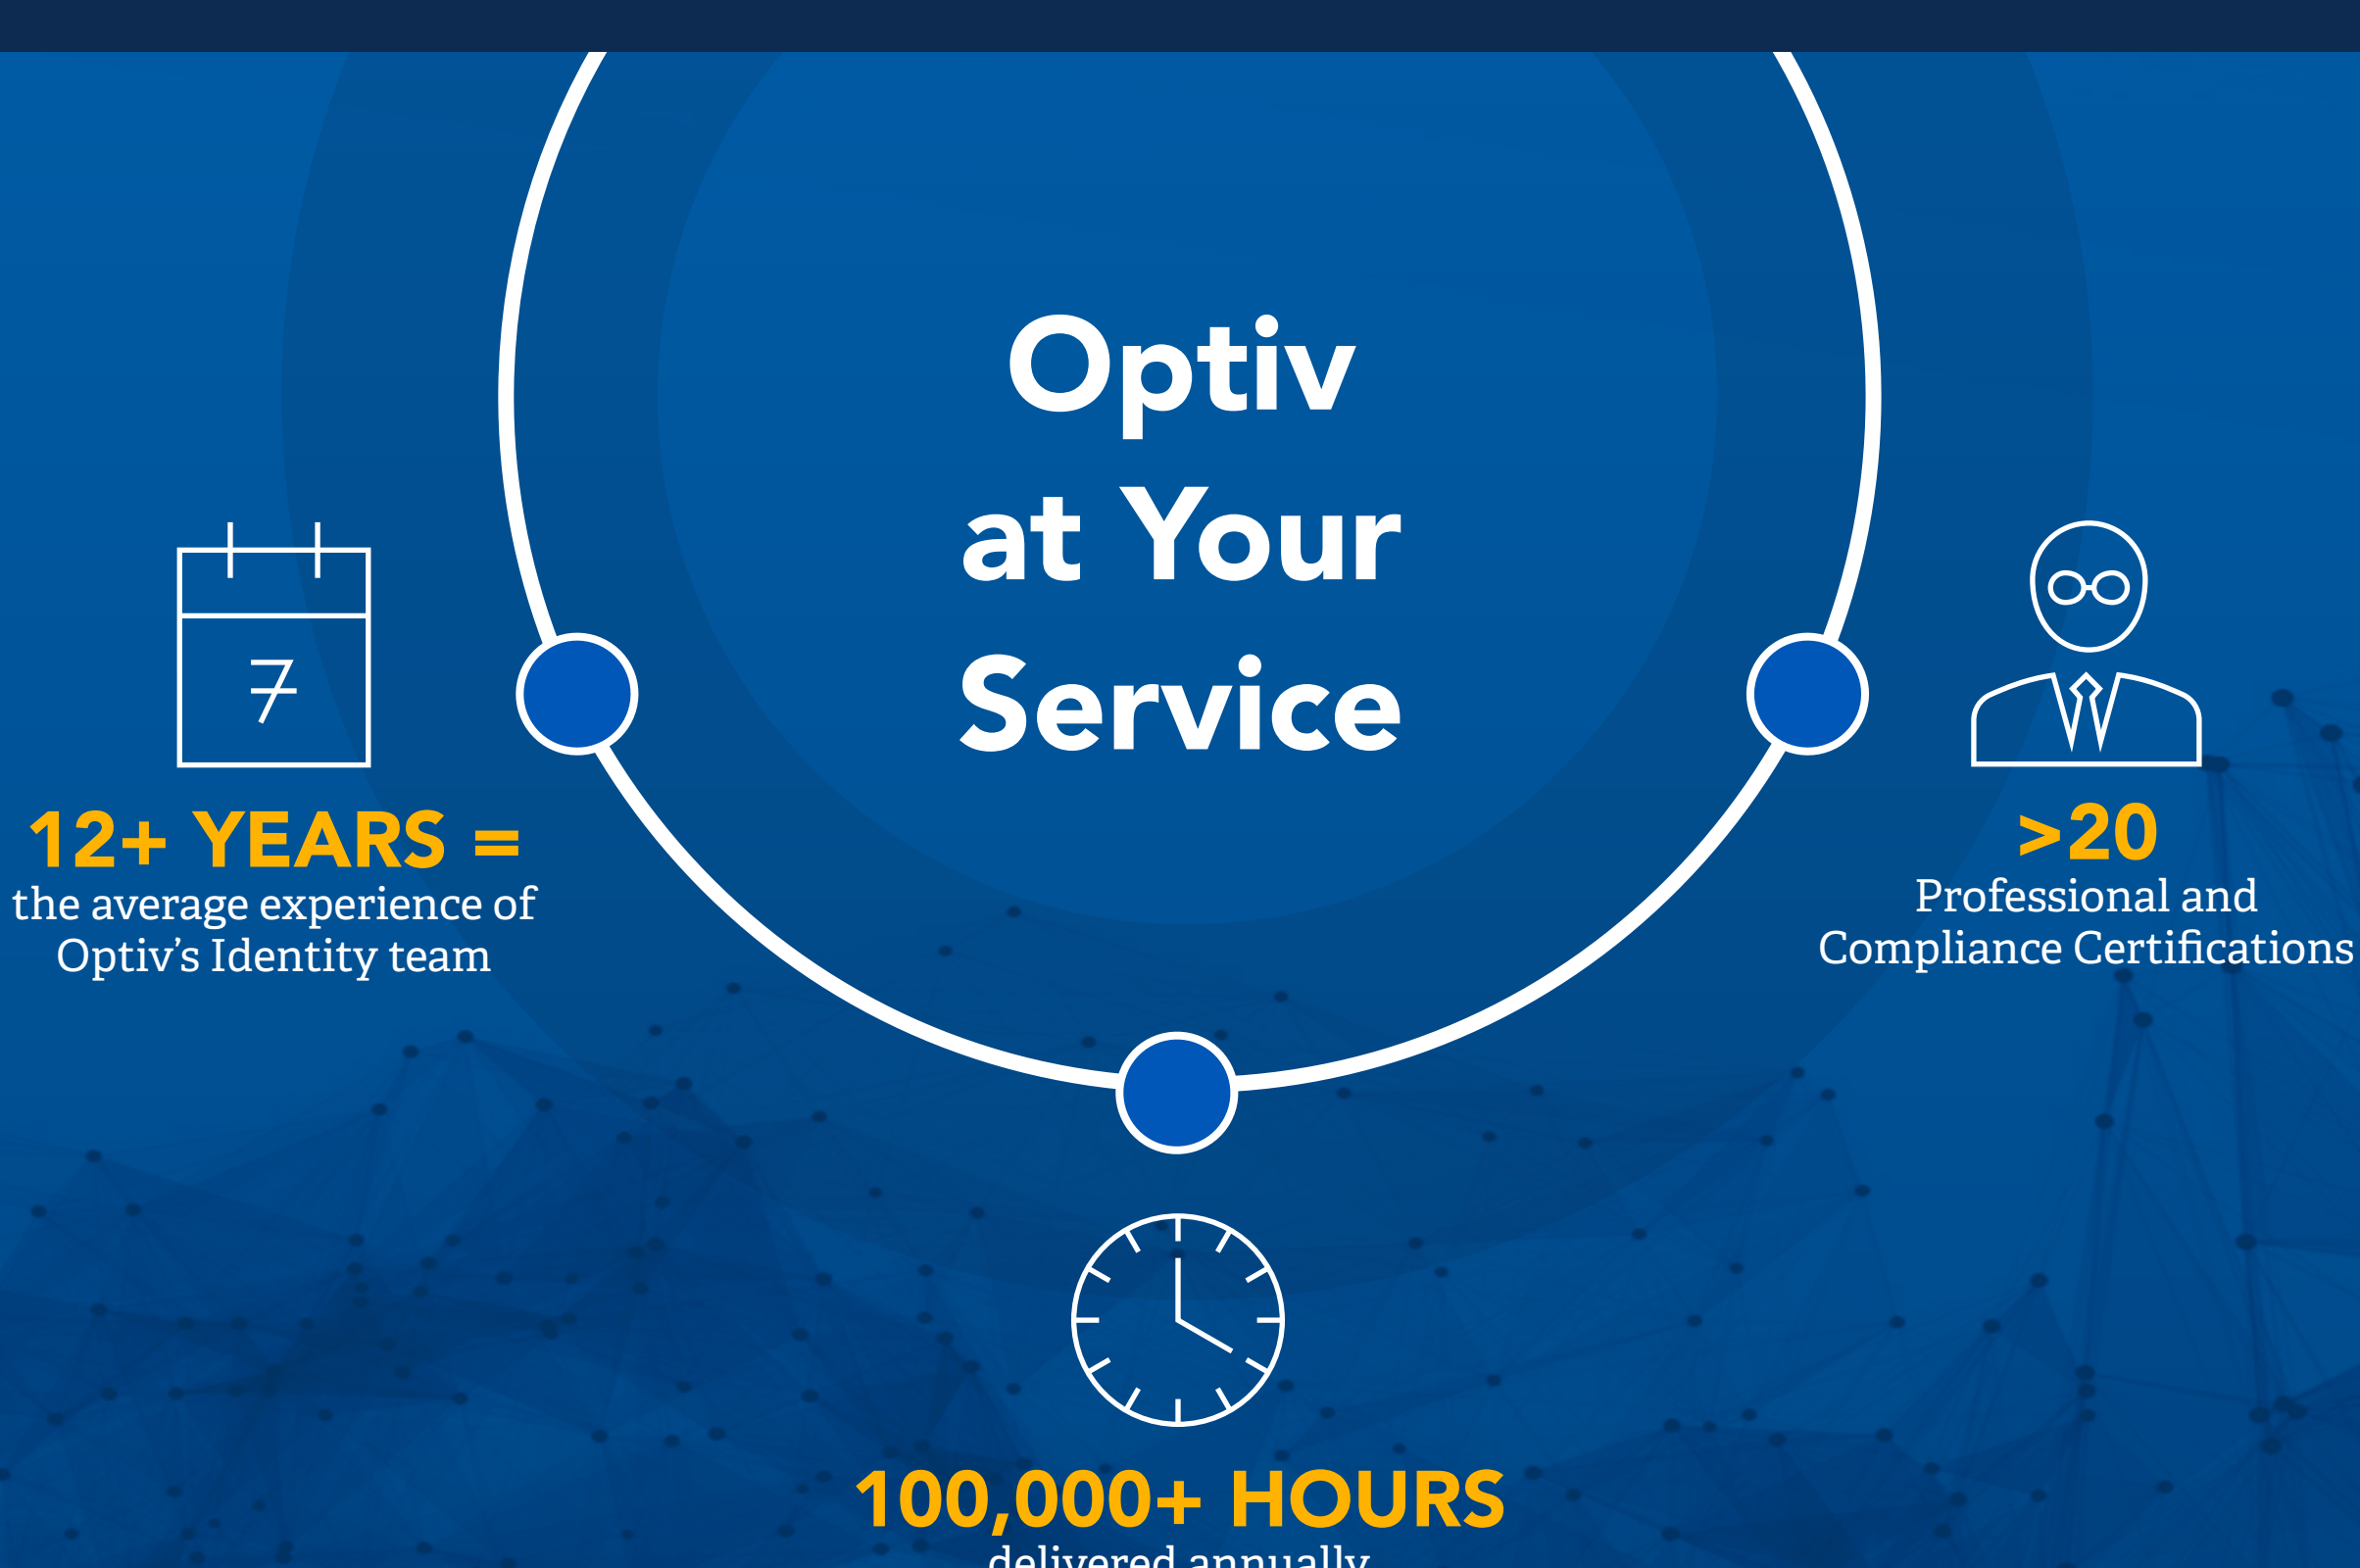

Let’s Tackle Identity Together

59%

of organizations say their top security priority is to improve the protection of confidential and sensitive data.³

Optiv’s Identity Security services utilize the power of SailPoint’s Intelligent Identity Platform. SailPoint is the market leader in the Identity Governance and Administration Gartner Magic Quadrant, providing a comprehensive platform for securing all digital identities that access applications and data across any hybrid IT.

Optiv’s Identity Security services can be deployed rapidly allowing users to connect and use SailPoint’s Identity platform services from the cloud for fast results and quick ROI.

Unmatched Identity Partnership

Optiv’s Identity service offerings are uniquely developed with SailPoint to address client challenges with best practices created over years of joint solution expertise. Our tightly aligned partnership provides a wide range of solutions that assist with implementing and operating your identity security program.

Extend the benefits of the cloud into your identity program.
