

PARTNER SERVICE BRIEF

Stronger Together

Delivering Seamless, Agile and Effective Identity Security Outcomes

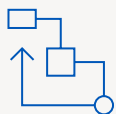

We live in a hyperconnected and constantly shifting world of people, applications, devices and data. As organizations move to the cloud and adopt new technologies, governing identities and access can be challenging—and increase organizational risk. Providing the right access, at the right time, to the right resources is critical for any organization, not just those with strict compliance requirements.

Implementing an identity security solution addresses these challenges while enabling growth and meeting regulatory requirements. By putting identity first, organizations can effectively gain greater visibility and control of their digital security. Optiv partners with SailPoint, a market leading Identity Security technology partner, to create a seamless and secure user experience. Our Identity Security services harnesses the power of SailPoint's identity platform to deliver a comprehensive identity program utilizing a subscription-based cloud model designed to simplify access and accelerate your business.

With three levels to our Identity Security services offering — there is an option designed for your business, regardless of where you are in your cyber maturity.

How Optiv Delivers Identity Security

Optiv's Identity Security services solution powered by SailPoint can be deployed rapidly allowing users to connect to and use identity security services from the cloud. It is comprised of the following services:

ACCESS CERTIFICATIONS

Using the power of AI and ML, automate the process of reviewing user access privileges (including human and nonhuman users such as bots) and providing audit trails for compliance purposes.

LIFECYCLE MANAGEMENT

Streamline the onboarding and off-boarding process with best practice configurations and workflows.

ACCESS REQUEST

Empower the entire business with a robust self-service platform for requesting and approving access to on-premise or cloud applications.

PASSWORD MANAGEMENT

Offer business users an intuitive self-service experience for managing and resetting passwords from any location and any device.
