SCIM Connector Extending Identity Governance to Your Highly Privileged Accounts

Today, many organizations have both privileged account management (PAM) and identity governance solutions that operate independently. As a result, organizations lack the ability to have a unified view of identities. The integration with SailPoint IdentityIQ will allow organizations to tie Secret Server entitlements back to identities in IdentityIQ. Leveraging the System for Cross-domain Identity Management (SCIM) standard, Thycotic’s SCIM Connector allows the automation and interoperability of user access. IT teams get full visibility into user access and role assignments as well as ongoing user and role changes.

**Simple Integration**
Streamlined setup that provides you with a unified view of access across your entire organization
No need to develop and constantly update custom integrations
Flexible and open standards based integration framework

**Centralized Management**
Manage user roles through a single platform
Improve workflows and consistency
Simplify user administration and system access
Gain visibility of privileged entitlement creep

**Consistent Control**
Holistically manage access to privileged and non-privileged accounts
Extend identity governance process and control to highly privileged accounts
Break down management silos and enforce consistent business processes and policies

**Auditing and Reporting**
Unified visibility, searching, reporting and auditing of all accounts
Auditing, reporting and alerts scheduled or custom
Meet compliance mandates to avoid significant financial penalties

---

**SCIM Connector Benefits**

**Improve Security**
Gain visibility and establish consistent controls over privileged accounts

**Unburden IT Teams**
Streamline delivery of privileged access to improve productivity

**Optimize your PAM**
Deploy rapidly for greater returns on your PAM investment

thycotic.com | sales@thycotic.com
Provide protection & control over privileged accounts that are not tied to a single identity.

Thycotic’s Secret Server, discovers, monitors, protects, and controls privileged accounts with Role Based Access Controls, so users have the access they require to perform their jobs successfully.

SCIM Connector allows your identity management platform to control entitlements without switching between platforms. When configured with SailPoint IdentityIQ you can set up workflows that allow you to provision or modify entitlements in Secret Server directly from inside IdentityIQ.

Key Features

• Automated Governance Controls
• Centralized Administration and Control
• Flexible and Open Integrations
• Out-of-the-Box Credential Cycling

Integrated Identity Governance & Privileged Access Management

SailPoint, the leader in enterprise identity management, brings the Power of Identity to customers around the world. SailPoint’s open identity platform gives organizations the power to enter new markets, scale their workforces, embrace new technologies, innovate faster and compete on a global basis. As both an industry pioneer and market leader in identity governance, SailPoint delivers security, operational efficiency and compliance to enterprises with complex IT environments. SailPoint’s customers are among the world’s largest companies.

Thycotic is focused on the most vulnerable attack vector – privilege. With Thycotic you can adopt a multi-layered approach that covers your privilege security needs from endpoints to credentials, ensuring protection at every step of an attacker’s chain.
