SailPoint IdentityNow enables you to rapidly mitigate risk and fortify your security efforts, implement policies to establish and maintain compliance, and automate IT tasks to improve operational efficiencies and save on IT costs.
Secure Your Digital Transformation

Digital transformation has opened up opportunities for greater agility and growth. But it’s also introducing challenges. Digital transformation means more users, more apps, and more data – and if not properly addressed, also means more risk. Organizations are addressing this risk while also taking advantage of all the benefits cloud provides with SailPoint IdentityNow™.

SailPoint IdentityNow allows you to answer three important questions: who has access to what, should they have access, and how are they using that access. Gain complete visibility and apply access controls for every user, application, and data resource throughout your hybrid IT environment.

Rapid Deployment with Zero Maintenance Burden

SailPoint IdentityNow is built from the ground up as a complete multi-tenant SaaS platform. Since it does not require hardware or software installation, you can rapidly and efficiently deploy and administer identity services from the cloud.

Designed with IT and security teams in mind, built-in identity best practices allow for simplified administration without the need for specialized identity expertise. All new and updated features and maintenance updates are automatically delivered to you, requiring zero downtime and IT effort. This frees up your IT resources and allows you to focus on delivering program results.

Quickly deploy and govern access to critical applications and systems
The SailPoint IdentityNow platform brings you the power of enterprise-grade identity governance coupled with the agility and convenience of the cloud. Identity services can be rapidly deployed, and administration can take place from anywhere at any time.

**Access Certification**
Automate the process of reviewing and reporting user access privileges across the organization. Quickly plan, schedule and execute comprehensive campaigns to ensure all types of users have the appropriate access to corporate resources.

**Provisioning**
Enable business users to be productive from day one. Streamline onboarding and off-boarding process with best practice configurations and workflows, enabling IT to automatically manage user access to the applications they need to perform their job.

**Access Request**
Empower the entire business with a self-service platform for requesting and approving access to applications, collection of entitlements within applications or application bundles, called “roles.” IdentityNow secures and automates the access request process and frees IT to work on strategic projects while quickly delivering business users the access they need to do their jobs.

**Password Management**
Offer business users an intuitive, self-service experience for managing and resetting their own passwords from any location and on any device, on- or off-network. Leveraging industry best practices, such as sequential multi-factor authentication, this service enforces consistent and secure password policies across all systems and users in the business, while eliminating helpdesk calls and strengthening your security posture.

**Separation-of-Duties**
Quickly create a library of policies to expose conflicts of interest and help eliminate fraud by requiring more than one individual be involved in any high-risk or sensitive task. Enforce critical risk and compliance controls by spanning policies across multiple systems and applications.

**Artificial Intelligence and Machine Learning**
Apply advanced governance capabilities, using the power of SailPoint Predictive Identity to discover suspicious or anomalous access, maintain continuous compliance and enjoy greater productivity across the entire organization. Utilize generated insights and recommendations to help guide decisions around your security and compliance related efforts.

**File Access Management**
Extend your identity governance capabilities to control access to sensitive data with SailPoint File Access Manager. Provided as an extension to the IdentityNow platform, you can discover where sensitive data resides, apply appropriate access
controls to improve security, mitigate compliance risks, and support greater efficiency across on-premises or cloud storage systems.

Connect to Everything Across Your Hybrid IT Environment
The power of IdentityNow resides in its ability to connect to applications, mainframes, cloud infrastructure, and data sources from across a hybrid IT environment.

IdentityNow also provides standards-based connectors to additional applications that leverage information exchange protocols such as REST, SCIM, JDBC, CSV and LDAP.

Cloud Platform Services
- **Updates and Patching** – Updates are pushed seamlessly without the need for system downtime.
- **Scaling** – Easily add users and dynamically scale to fit changing organizational needs.
- **Alerting** – SailPoint provides proactive notifications of added services or status updates.
- **Monitoring** – SailPoint delivers 24/7 oversight and support.

Meets Security Standards
SailPoint eliminates the need for organizations to choose between security or convenience. We’ve architected IdentityNow around fundamental principles that ensure best of breed security practices.

- Meets security standards ISO 27001:2013 and SOC 2 Type 2
- Allows your business-critical data to stay where it belongs, behind your firewall.
- “Zero Knowledge Encryption” protects administrative access and interaction with external systems.

Professional Services and Support
Our team of expert Professional Services specialists, as well as our global network of partners, are available to provide assistance from initial deployment to ongoing management of IdentityNow.

As a true software-as-a-service platform, IdentityNow is committed to maintaining enterprise-class Service Level Agreements. Dedicated DevOps and technical support resources provide ‘round-the-clock’ customer support.

Training
SailPoint’s Identity University provides training and certification designed to increase productivity across your teams and ensure the most successful implementation.

Our Industry Leadership
SailPoint maintains the highest leadership position across all major analyst reviews and, due to the success of our customers, maintains a 95%+ customer retention rate across all industry verticals.
