

Identity**Now**®

**SaaS-based Identity
Security Solution**

Discover, Manage, and Secure All Identities

Success for the modern cloud enterprise depends on securely connecting the right people to the right technology for great employee experiences. This means maintaining security of all apps, systems, and data across their entire environment (on premises and in the cloud).

SailPoint IdentityNow is a modern SaaS-based Identity Security solution that provides a centralized way to see and control every user's access to resources across hybrid IT environments, while ensuring regulatory compliance. IdentityNow has built-in identity best practices that allow simplified administration without the need for specialized identity expertise.

Rapid Deployment with Zero Maintenance Burden

A subset of SaaS components from the SailPoint Identity Security Cloud, SailPoint IdentityNow is a complete multi-tenant SaaS solution. Since it does not require hardware or software installation, organizations can rapidly and efficiently deploy and administer Identity Security services from the cloud.

Comprehensive Identity Security

With services that can be rapidly deployed and administered from anywhere at any time, SailPoint IdentityNow brings the power of enterprise-grade Identity Security coupled with the agility and convenience of the cloud.

Lifecycle Management

Manage user access through streamlined self-service requests and lifecycle events to deliver fast, automated access to all types of users.

Simplify Access Requests

Manage high volumes of access changes and requests through automation.

Maximize Worker Productivity

Provision workers with the correct access they need right when they need it.

Instantly Act on Critical Access

Continuously monitor access across the organization to identify and deprovision risky, unused, orphaned, or dormant accounts.

Strengthen Real-Time Security Efforts

Ensure all access follows proper policy with built-in tools that instantly spot potential risks.

Compliance Management

Automate access certifications, policy management, and audit reporting to simplify compliance processes and strengthen identity governance.

Improve Certification Efficiency

Make user access reviews fast, simple, and accurate for your organization by expediting processes and increasing visibility.

Quickly Respond to Audit Requests

Maintain a full audit trail of accounts, entitlements, policies, and actions – to the minute – and address audit needs with ease.

Streamline Policies and Privileges

Monitor and update companywide policies and privileges in real time from a centralized dashboard.

Protect Your Organization

Avoid compliance violations and security risks with autonomous capabilities for Separation-of-Duties that identify risky user accounts and access.

Password Management

Offer business users an intuitive, self-service experience for managing and resetting their own passwords from any location and on any device, on-or off-network. Leveraging industry best practices, such as sequential multi-factor authentication, this service enforces consistent and secure password policies across all systems and users in the business, while eliminating helpdesk calls and strengthening your security posture.

Connectors and Integrations

The power of IdentityNow resides in its ability to connect to applications, mainframes, cloud infrastructure, and data sources from across a hybrid IT environment.

Connectors

Sync apps and data sources to securely manage identity everywhere.
More than 100 out-of-the-box connectors available, including:

IdentityNow also provides standards-based connectors to additional applications that leverage information exchange protocols such as REST, SCIM, JDBC, CSV and LDAP.

Advanced Integrations

Leverage bi-directional integrations for enhanced data, performance, and security.

AI-Driven Identity Security

Artificial Intelligence (AI) and Machine Learning (ML) proactively gives organizations visibility at speed and scale into what access is necessary and what access is at risk for potential security breaches.

Automate the discovery, management, and control of ALL user access to make better and faster access decisions, and to spot potential threats. Three components of AI-Driven Identity Security include:

Access Role Modeling

Build and maintain user roles to continuously monitor and adjust access across your entire organization.

Access Insights

Transform user attributes, roles, access history, and entitlements into actionable insights. Identify access outliers with AI-driven visibility to spot risks faster and track effectiveness with review dashboards and reports.

Access Recommendations

Speed up lengthy certification processes and make smarter access decisions in less time. Automated recommendations are based on peer group analysis, identity attributes and access activity.

SaaS-based Identity Security Benefits

Updates and Patching – Updates are pushed seamlessly without the need for system downtime.

Scaling – Easily add users and dynamically scale to fit changing organizational needs.

Alerting – SailPoint provides proactive notifications of added services or status updates.

Monitoring – SailPoint delivers 24/7 oversight and support.

Meets Security Standards

SailPoint eliminates the need for organizations to choose between security or convenience. We've architected IdentityNow around fundamental principles that ensure best-of-breed security practices.

Meets security standards ISO 27001:2013 and SOC 2 Type 2

Allows your business-critical data to stay where it belongs, behind your firewall

"Zero Knowledge Encryption" protects administrative access and interaction with external systems

Professional Services and Support

Our team of expert Professional Services specialists, as well as our global network of partners, are available to provide assistance from initial deployment to ongoing management of IdentityNow.

As a true software-as-a-service platform, IdentityNow is committed to maintaining enterprise-class Service Level Agreements. Dedicated DevOps and technical support resources provide 'round-the-clock' customer support.

Training

SailPoint's Identity University provides training and certification designed to increase productivity across your teams and ensure the most successful implementation.

Our Industry Leadership

SailPoint maintains consistently high ratings by analyst firms and, due to the success of our customers, maintains a 95%+ customer retention rate across all industry verticals.

GLOSSARY

GRC	Governance, Risk, and Compliance
SIEM	Security Information and Event Management
UBEA	User and Entity Behavior Analytics
CASB	Cloud Access Security Broker
REST	Representational state transfer
SCIM	System for Cross-domain Identity Management
JDBC	Java Database Connectivity
CSV	Comma-Separated Values
LDAP	Lightweight Directory Access Protocol

About SailPoint

SailPoint is the leading provider of identity security for the modern enterprise. Enterprise security starts and ends with identities and their access, yet the ability to manage and secure identities today has moved well beyond human capacity. Using a foundation of artificial intelligence and machine learning, the SailPoint Identity Security Platform delivers the right level of access to the right identities and resources at the right time—matching the scale, velocity, and environmental needs of today's cloud-oriented enterprise. Our intelligent, autonomous, and integrated solutions put identity security at the core of digital business operations, enabling even the most complex organizations across the globe to build a security foundation capable of defending against today's most pressing threats.
