

# Maximize Security. Minimize Resource Impact.

## What's In It For You?

### Chief Security Officer

Secure citizen and even classified data while optimizing access workflow for clinicians and other users.

### Chief Information Officer

Reduce the amount of money, time and effort to govern access for all users.

### Chief Compliance Officer

Consistently maintain regulatory compliance through audit trails and reporting.

### Chief Financial Officer

Cost-effectively improve audit performance and reduce risk of fines.

### Elected Official

Protect constituents by securing their personal data and reduce liability by mitigating the risk of a breach.

Preventing a data breach has always been an uphill climb. But is the hill getting steeper? With an increasing volume of health data breaches<sup>1</sup>, rising costs (*Figure 1*) and an ever-widening skills/personnel gap in cybersecurity (*Figure 2*), cloud-based identity levels the playing field. It enables federal, state and local government agencies to address cyber threats even with limited resources at their disposal.

## Cybersecurity Made Manageable and Affordable

SailPoint's AI-enabled cloud identity platform deliver all the critical capabilities that enable public agencies to secure all applications and data in several critical ways:

- **Prevent Data Breaches** by identifying anomalous access and appropriately provisioning/deprovisioning access rights
- **Reduce Audit Fines** by proving compliance to auditors
- **Improve Efficiencies** by automating access reviews
- **Optimize Workflow** through self-service password management and access requests

**Beyond these business benefits,** deploying identity governance from the cloud can deliver other significant value including:

-  **Reduce** need for in-house expertise
-  **Decrease** capital expenditure
-  **Rapidly Deploy** identity programs
-  **Slash** lead time for upgrades
-  **Configure** for unique use cases

## Navigating Cloud Identity with SailPoint

While there are common use cases for identity in government, each public agency typically has additional, unique requirements. That's why SailPoint offers flexible cloud deployment options to deliver an effective solution that is uniquely appropriate for the organization.

**SAILPOINT:  
THE POWER  
OF IDENTITY™**

[sailpoint.com](https://sailpoint.com)

SailPoint, the leader in enterprise identity management, brings the Power of Identity to customers around the world. SailPoint's open identity platform gives organizations the power to enter new markets, scale their workforces, embrace new technologies, innovate faster and compete on a global basis. As both an industry pioneer and market leader in identity governance, SailPoint delivers security, operational efficiency and compliance to enterprises with complex IT environments. SailPoint's customers are among the world's largest companies.
