

Securely Optimize Student Access for Less

What's In It For You?

Provost

Streamline and automate critical processes to optimize user access experience for the entire student population and provide board members with greater assurance against data breaches.

Student

Gain appropriate and timely access to data and applications essential for their learning experience.

Chief Information Officer

Reduce cost, time and effort to govern access for all users.

Chief Security Officer

Leverage proven solutions to reduce risk of a data breach while optimizing access workflow for students, faculty, staff, etc.

Chief Financial Officer

Cost effectively improve audit performance and reduce risk of fines.

It doesn't require a team of IT experts and a large budget to improve the students' information access experience while creating a more secure environment for users. Cloud-based identity helps higher education institutions challenged with limited financial and operational resources to effectively govern **who has and should have access to what, and how that access is used.**

Why Cloud-Based Identity?

Constrained by limited financial and personnel resources, educational institutions can leverage cloud-based identity to cost effectively improve user experience while securing student, financial, and proprietary information.

A cloud-based identity platform enables educational institutions to do the following:

- **Improve user experience through** self-service password reset for students, faculty, staff and others.
- **Drive efficiencies** by automating delivery and removal of access rights.
- **Inhibit data breaches** by monitoring access behavior.
- **Reduce audit risks** by proving compliance to auditors.

Beyond these business benefits, deploying identity governance from the cloud can deliver other significant value including:

-  **Reduce** need for inhouse expertise
-  **Decrease** capital expenditure
-  **Rapidly Deploy** Identity Programs
-  **Slash** lead time for upgrades
-  **Configure** for unique use cases

Deploying Cloud-Based Identity with SailPoint

While there are common use cases for identity governance in higher education, each education institution typically has additional, unique requirements. That's why SailPoint offers flexible cloud deployment options to deliver an effective solution that addresses the specific needs of each educational institution.

Learn how to leverage SailPoint's expertise and proven approach to deliver great user access experience while securing PII, financial and proprietary data, even with limited resources.
